

1) When you design a sheet, which option can reduce the amount of space needed by allowing the same chart to be displayed by different dimensions?

- Cyclic group
- Lookup Dimension
- Layer Expression
- Multi Box

2) Which type of Qlikview object cannot be configured with any trigger actions?

- Gauge
- Text Object
- Sheet
- List Box

3) Which visualization method is being used in this series of numbers to highlight those of interest? (Refer image 1)

- Cherry Picking
- Exaggeration
- Preattentive Perception
- Visual Grouping

4) Which is the correct order of the visualization design process?

- Platforms, Information Design, Visual Design, Testing, Users & Context
- Platforms, Visual Design, Information Design, User & Context, Testing
- User & Context, Information Design, Platforms, Visual Design, Testing
- User & Context, Platforms, Information Design, Visual Design, Testing

5) Which is NOT a good method for gathering user information?

- Questionnaires
- Interviews
- Field Studies
- Preconceptions

6) Compare the two charts shown. What is the main visualization advantage of displaying the line to join the data points? (Refer image 2)

- None, they both show same information
- the line stop human enclosure hiding the outlier
- The line display the correct sequence of the data point
- the line exaggerates the chart trend

7) Which data category is not represented by the attributes in this example?

- Nominal Data
- Ordinal Data
- Interval Data
- Ratio Data

8) Why would you be careful when encoding nominal data using red and green?

- They should only be used with traffic light chart types
- They make a charts look ugly due to the contrast in color
- Because approximately 10% of the male population are red-green colorblind
- Color choice makes no difference so long as the representation looks good

9)DAR is a Qlikview design concept. which is the correct list of words which make up this acronym?

- Dashboards,Analysis,Reports
- Data,Accumulation,Results
- Design,Architecture,Reports
- Direct Access Reporting
- Don't know

10)Which is the best chart type to represent ranked data, such as Sales by Region?

- Horizontal Bar Chart
- Pie chart
- Combo chart
- Pivot table
- Don't know

11)Which display method is being used by this report?

- Color mix
- Dynamic Colors
- Silent Legend
- Color emphasis
- Don't know

12)In your QlikView application,How would you create a button that toggles a help layer on or off?

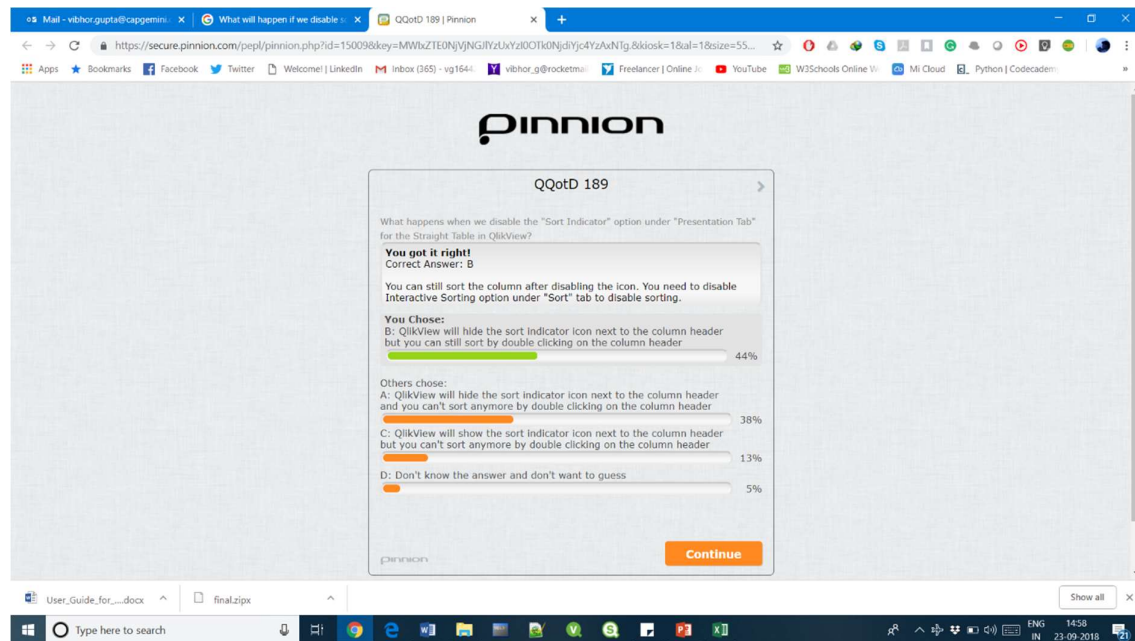

- Use a chart Extension Object
- Set a variable with the button and use conditional show on the help objects
- Use the Button to control the layer properties of the help objects
- Link the button to the pop up property of the help objects
- Don't know

Q1

Which of the following is not true regarding binary load?

Ans. Binary load does inherit all the data in a .qvd file

Q2

Q3

Which of the following are acceptable configuration for a water fall chart visualization type.

Ans. (a) Multiple measures

(b) Two measures

Q4

QlikSense provide very small amount of screen space(as using app on a mobile)

Ans We will be unable to do

Q5

```
Valuelist('OrderID', 100, 101, 102, 103, 104, 105 )
```

What is the output?

Single Choice - Select one correct answer from the options list.

- OrderId, 100, 101, 102, 103, 104, 105
- OrderId
- 100,102,103,104,105
- OrderId, 101,105

Q6

```
is null(TableA)
```

What is the output?

Single Choice - Select one correct answer from the options list.

- If TableA contains 0 rows it will give 1
- If TableA contains more than 1 rows it will give 1
- If TableA contains more than 1 rows it will give False
- If TableA contains 100 rows it will give True

Q7

Which of the following are acceptable data configurations for the histogram visualization type?

Single Choice - Select one correct answer from the options list.

1 field

1 dimension, 1 measure

2 fields

All of the above

Q8

Which of the following is not a Qlik Sense server?

Ans Management Server

Q9

Not true about Qlik Sense

Ans.9 usercal

Ans.10 resize window,

Ans.11 stastics chart wizard

Q12

In which format QS store app

Ans. Binary

Q13

Result of expression

Range_sum_of(1,2,'abc',NULL)

Ans.8

Q14

which of the following is false about table viewer

Ans Shows synthetic keys is incorrect

Q15

Best way to search for all occurrences of a particular list in all examples.*

Ans Search into the expression overview in setting panel

Q16

What will happen if .xls is not present?

Ans. Qv will simply return "Execution of script failure".

Q17

Which is true related to binary statements.

Ans

1. **Only one binary statment will allowed in script,**
2. **Can store binary data from other qvd files**

Q18

Auto Number system is used in?

Ans Load Statement

Q19

Business Users will access which of the following dashboards:

Multiple Choice - This may have multiple correct answers. Select required answer(s) from the options list.

Access Portal

Access Point

Access Interface

AJAX

None

Q20

Scrambling will be applied on

Ans Document

Q21

Object ID exists for sheet operation

Ans TRUE

Q22

This is a away to reduce

Ans. Keeing possible values , removing all values

Q23*

Export contents option disable when not selected

True

Q24

Improves dashboard

Ans. Inc Virtual mem, calculated karke

Q25

By default log files will genr when we refresh

True

Q26

What does the following set of expr mean

Sum(sales)

Q27

What sum(\$*[]My Bookmark]sales)

Ans B.

It means ret sum of sales from intersection of my book and current selections

Q28

Count({Bm10 * bm02 - \$} distinct products)

Ans. B. intersection of both bm and not considering current selection

Q29

Vmdd

Ans. Let vmdd=; , let vmdd=null

In qv load script what is eqv have in sql

Ans. Using inly funct group by claue

Object id exist for sheet expr

Ans.

At the end of the script sec qv automatically assumes ;

True

Qv qs mobile app

Ans. We will be unable to do

Range sum of 1,2,'abc' => B

When you load...

B

Not true abt dev hub

Ans not a qv converter

3 main comp -> sheet,data,guide

Best option to load data bubble view -> A

Bar chart visualization type -> all three

Capability selection barr -> clear all select, clear individual selections
